# DR. BRIAN J. JACKSON

DIPLOMATE-AMERICAN BOARD OF ORAL IMPLANTOLOGY/IMPLANT DENTISTRY

FELLOW-AMERICAN ACADEMY OF IMPLANT DENTISTRY

## 10 FACTS

## A PATIENT SHOULD KNOW ABOUT DENTAL IMPLANTS

1. Dentures retained by implants can eliminate sore spots and slippage while making your speech and cosmetics much better. You will look and feel younger and healthier!
2. Dental Implants are not experimental. In fact, Implants have been successfully used since 1977 (over 30 years!)
3. Dental Implants are performed using a local anesthetic (i.e. Novocaine). No different than for a dental filling. This makes for a relatively pain-free procedure and ensures your comfort.
4. Discomfort after an implant procedure is eliminated with an anti-inflammatory medication (i.e. Advil.) Narcotics like Tylenol #3 are never needed to control pain.
5. Dental Implants are most successful when the surgery and the crown or dentures are accomplished over a few months period. Bone needs time to heal.
6. After Implant placement, the patient always leaves the office with a full smile. The patient never leaves without teeth.
7. Insurance coverage and flexible financial arrangements are available so that all patients can afford ideal treatment.
8. Dental Implants last longer than other dental treatment options because Implants never decay. (A better investment in the long run). This saves you money and spares you the inconvenience of repetitive future visits.
9. Dentists that are Diplomats have been credentialed by a Board of experts and are the highest credentialed dentists for implant procedures. Dr. Jackson is a Diplomate of the American Board of Oral Implantology/ Implant Dentistry.
10. A Board Certified Implant Dentist should complete the entire Implant procedure to ensure the highest quality outcome and a more pleasurable experience. You shouldn't be forced to see many dentists for different aspects of one treatment.

**Dental Implants have become the standard of care, as well as the treatment of choice for tooth replacement.  
Scientific research has proven that dental implants exhibit the best long term prognosis.**

Please Call Dr. Jackson today for an Implant evaluation at **315-724-5141.**

“It's your turn to smile now.”
